4 Percentages are based on victims/survivors receiving services for whom this information was known.
5 Some victims/survivors may identify with more than one race/ethnicity, so the total number reported in race/ethnicity may be higher than the total number of victims/survivors served.
6 Victims/survivors may have been abused by more than one offender and/or might have experienced more than one type of victimization, so the total for each victimization category (when unknowns are included) may be higher than the total number of victims/survivors served in each of those categories. Percentages presented here are based on the total number of known relationships in each victimization category.
